

**Natural Choice Products Ltd**

Safety Data Sheet  
Table Kleen

**1.IDENTIFICATION OF THE MATERIAL AND SUPPLIER**

<b>Product Name:</b>	Table Kleen
<b>Recommend Use:</b>	Cleaning and degreasing hard surfaces.
<b>Supplier Name:</b>	Natural Choice Products Ltd
<b>Address:</b>	4/26 Bancroft Crescent, Glendene, Auckland
<b>Telephone:</b>	(+64) 9 441 4238
<b>Website:</b>	<a href="http://www.naturalchoice.co.nz">www.naturalchoice.co.nz</a>
<b>Emergency Phone:</b>	National Poisons Centre 0800 POISON (0800 764 766)

**2. HAZARDS IDENTIFICATION**

GHS Classification  
Eye Irritation Category 2B  
Skin Corrosion/Irritation Category 3

HAZARD  
WARNING

Determined by Chemwatch using GHS/HSNO criteria:  
6.1E,6.1A,6.3A,6.4A,6.5B,6.1D,8.3A,9.1A,9.2C,9.2D,9.2B,9.1D  
Causes mild skin irritation  
Causes eye irritation

**PRECAUTIONARY STATEMENTS**

**Prevention**

Wash thoroughly after handling.

**Response:**

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

If skin irritation occurs: Get medical advice/ attention.

If eye irritation persists: Get medical advice/attention.

### 3. COMPOSITION/ INFORMATION ON INGREDIENTS

Ingredient Name	CAS Number	Concentration %w/w
Tetrasodium EDTA	64-02-8	< 5
Potassium hydroxide	1310-58-3	< 5
Benzenesulphonic acid	68584-22-5	< 5
Coconut fatty acid diethanolamide	61791-31-9	< 5
formaldehyde	50-00-0	< 5
Sodium hydroxide	1310-73-2	< 5
Pentasodium tripolyphosphate	7758-29-4	< 5
Sodium lauryl ether sulphate	9004-82-4	< 5
Cocoamido betaine	61789-40-0	< 5

Other ingredients, determined not to be hazardous subject to the provisions of the Hazardous Substances (Identification) Regulations 2001, make up the product concentration to 100%.

### 4. FIRST AID MEASURES

For advice, contact National Poisons Centre (0800 POISON; 0800 764 766) or a doctor. Have product container or label available.

#### Swallowed

- Immediately give a glass of water.
- First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.
- For advice, contact a Poisons Information Centre or a doctor.

#### Skin

- If skin contact occurs:
- Immediately remove all contaminated clothing, including footwear.
- Flush skin and hair with running water (and soap if available).
- Seek medical attention in event of irritation.

#### Eye

- If in eyes, hold eyelids apart and flush the eye continuously with running water.
- Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes.
- Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.
- Seek medical attention without delay; if pain persists or recurs seek medical attention.

#### Inhalation

- If fumes or combustion products are inhaled remove from contaminated area.
- Other measures are usually unnecessary.

---

**Advice to Physician**

Treat symptomatically

**5. FIRE FIGHTING MEASURES**

<b>Flash Point:</b>	Not available
<b>Auto ignition Temperature:</b>	Not available
<b>Flammable Limits in Air % by Volume:</b>	Not available
<b>Extinguishing Media:</b>	All
<b>Fire Fighting Instructions:</b>	Noncombustible
<b>Unusual Fire and Explosion Hazards:</b>	Not considered a significant fire risk, however containers may burn. May emit corrosive fumes

**6. ACCIDENTAL RELEASE MEASURES**

MINOR SPILLS

- Clean up all spills immediately.
  - Avoid breathing vapours and contact with skin and eyes.
  - Control personal contact by using protective equipment.
  - Contain and absorb spill with sand, earth, inert material or vermiculite.
- Personal Protective Equipment advice is contained in Section 8 of the MSDS.

**7. HANDLING AND STORAGE**

PROCEDURE FOR HANDLING

- Avoid all personal contact, including inhalation.
- Wear protective clothing when risk of exposure occurs.
- Use in a well-ventilated area.
- Prevent concentration in hollows and sumps.
- DO NOT allow clothing wet with material to stay in contact with skin.

SUITABLE CONTAINER

- Polyethylene or polypropylene container.
- Packing as recommended by manufacturer.
- Check all containers are clearly labelled and free from leaks.

STORAGE REQUIREMENTS

- Store in original containers.
- Keep containers securely sealed.
- Store in a cool, dry, well-ventilated area.
- Store away from incompatible materials and foodstuff containers.

## 8. EXPOSURE CONTROLS: PERSONAL PROTECTION

### PERSONAL PROTECTION

#### EYE

- Safety glasses with side shields.
- Chemical goggles.
- Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lens or restrictions on use, should be created for each workplace or task. This should include a review of lens absorption and adsorption for the class of chemicals in use and an account of injury experience. Medical and first-aid personnel should be trained in their removal and suitable equipment should be readily available. In the event of chemical exposure, begin eye irrigation immediately and remove contact lens as soon as practicable. Lens should be removed at the first signs of eye redness or irritation - lens should be removed in a clean environment only after workers have washed hands thoroughly. [CDC NIOSH Current Intelligence Bulletin 59]

#### HANDS/FEET

Suitability and durability of glove type is dependent on usage. Important factors in the selection of gloves include: such as:

- frequency and duration of contact,
- chemical resistance of glove material,
- glove thickness and
- dexterity
- Wear general protective gloves, eg. light weight rubber gloves.

#### OTHER

No special equipment needed when handling small quantities.

#### OTHERWISE:

- Overalls.
- Barrier cream.
- Eyewash unit.

### ENGINEERING CONTROLS

General exhaust is adequate under normal operating conditions. Local exhaust ventilation may be required in special circumstances.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state:	Liquid
Colour:	Blue
Odour:	Not Available
Melting Point:	Not Available
Vapour pressure:	2.3 @ 20°C.

Date of issue: 30/3/2020

---

Specific gravity:	1
Flash point	Not Available
Vapour density	Not Available
PH	PH7

## 10. STABILITY AND REACTIVITY

### CONDITIONS CONTRIBUTING TO INSTABILITY

- Presence of incompatible materials.
- Product is considered stable.
- Hazardous polymerization will not occur.

For incompatible materials - refer to Section 7 - Handling and Storage.

## 11. TOXICOLOGICAL INFORMATION

### POTENTIAL HEALTH EFFECTS

#### ACUTE HEALTH EFFECTS

- Ingestion:** Although ingestion is not thought to produce harmful effects (as classified under EC Directives), the material may still be damaging to the health of the individual, following ingestion, especially where pre-existing organ (e.g liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality rather than those producing morbidity (disease, ill-health).
- Eye contact:** Although the liquid is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may produce transient discomfort characterised by tearing or conjunctival redness (as with windburn). The material may be irritating to the eye, with prolonged contact causing inflammation. Repeated or prolonged exposure to irritants may produce conjunctivitis.
- Skin contact:** The material is not thought to produce adverse health effects or skin irritation following contact (as classified by EC Directives using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting.
- Inhalation:** The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified by EC Directives using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.
- Chronic effects:** Prolonged or repeated skin contact may cause drying with cracking, irritation and possible dermatitis following.  
Long-term exposure to the product is not thought to produce chronic effects adverse to health (as classified by EC Directives using animal models); nevertheless exposure by all routes should be minimized as a matter of course

**Toxicity and  
Irritation**

Not available. Refer to individual constituents

**12. ECOLOGICAL INFORMATION**

Not Available

**13. DISPOSAL CONSIDERATION**

- Recycle where possible
- Otherwise ensure that:
- licensed contractors dispose of the product and its container.
- disposal occurs at a licenced facility

**14. TRANSPORT INFORMATION**

HAZCHEM:

None

NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS: UN, IATA, IMDG

**15. REGULATORY INFORMATION**

HSNO Classifications:

- 6.1A: Substances that are acutely toxic - Fatal
- 6.1D: Substances that are acutely toxic - Harmful
- 6.1E: Substances that are acutely toxic –May be harmful, Aspiration hazard
- 6.3A: Substances that are irritating to the skin
- 6.4A: Substances that are irritating to the eye
- 6.5B: Substances that are contact sensitisers
- 8.3A: Substances that are corrosive to ocular tissue
- 9.1A: Substances that are very ecotoxic in the aquatic environment
- 9.1D: Substances that are slightly harmful to the aquatic environment or are otherwise designed for biocidal action
- 9.2B: Substances that are ecotoxic in the soil environment
- 9.2D: Substances that are slightly harmful in the soil environment
- 9.3C: Substances that are harmful to terrestrial vertebrates

**16. OTHER INFORMATION**

Date of previous issue: 13/01/2019
